Research Manager

Welcome

Dear Colleague

Thank you for your interest in this EyeforTravel report on the travel consumer's booking and research patterns. I hope you find it as valuable as your peers who have reviewed and contributed to this document.

Online travel distribution is undergoing great changes currently, with intense pressure on deciding where to invest marketing and sales budgets. Ultimately, the key determinant is what provokes their interest or drives consumers to purchase travel from a specific travel brand. To answer this, EyeforTravel commissioned consumer research in the United States – surveying 3,044 online travel consumers.

This is combined with historic and current data on marketing expenditure and expert interviews with 20 travel executives. The accumulated expertise will better inform your strategies for the years to come.

This report is only the beginning of the debate around online travel distribution. My thoughts have already turned to improvements for next year. Please get in touch if you'd like to be involved in future work, or if you have any suggestions for future topics and angles relevant to your business.

I look forward to speaking to you soon,

With very best wishes

Piers French
